Thanks Jody! Appreciate the help. So I didn't have access to Joel's calendar, and he will be gone the week of July 11th, but we can support the call. I am a little worried about waiting until July 11th and July 19th to talk about this. If it has to go out to public comment by the 1st of September, that only gives six weeks to put the supporting document together. Wondering if we could do next week, maybe Wed or Thurs - not sure when you leave for your vacation. Anyway, we will figure it out somehow! Thanks!  
Sheila

Hi Sheila,

I was a little bit frustrated with the conversation about the EE demonstration, because I thought we agreed on last month's call that Minnie would review the guidance, reach out to Huy, and then send us a request for assistance, specifying which parts of the package she needed help with. Richard was pretty clear that that the request for help needs to come from the tribe. That's what my notes say. And then a month goes by.

Anyway, I think we have a plan now. So thanks for trying to smooth things over.

Regarding the FIP, I guess OMB has to formally "accept" the FIP for review. So, although OP approved the FIP and sent it to OMB, it won't be posted on the web site until OMB "accepts" it for review. I was a little premature in announcing that it was posted to the web site. I will let you know when I do, but it might be worth checking the site every once in a while.

Thanks,

Jody

Thanks for this information Jody and thank you for the call today. Sorry if I added to any confusion on the exceptional event, this is all new to me and I just wasn't sure why this was seeming so difficult, but I realize that there is a lot of coordination and it isn't simple! Hopefully we can work this out and we will do what ever we can to help. Had a question, so when you stated that the FIP was now public, does that mean that there is a draft document to review or is it that it is now public as to where it is in the review cycle. Hope that makes sense, was just looking at the notice that it is at OMB, but didn't see a document to look at. Sorry, still learning all this!

Thanks! Sheila
